Sugar also led to some industrialization of areas where sugar cane was grown. For example, in the 1790s Lieutenant J. Paterson, of the Bengal establishment, promoted to the British Government the idea that sugar cane could grow in British India, where it had started, with many advantages and at less expense than in the West Indies.

Small organic molecules on ice and water surfaces play crucial roles in many environmentally relevant processes. Surface-specific vibrational spectroscopy was combined with a controllable flow cell apparatus to investigate the molecular adsorption of acetone onto the basal plane of single-crystalline hexagonal ice with a large surface area.

Type of Technology(ies): Amyris has developed genetic engineering technologies that enable modification of the way microbes process (i.e., metabolize) sugar. By controlling these metabolic pathways, Amyris is able to design microbes, primarily yeast, to be tiny living factories that convert plant-sourced sugars from crops such as sugarcane or sweet sorghum into target molecules. Using its ...
