The main advantage of particle beam weapons is they have penetration that make lasers look like throwing a handful of thistle down. The main drawbacks of particle beam weapons is they are power hogs, they are difficult to reduced to pistol size, and Terra's atmosphere will scatter enough of the beam to give the firer a lethal dose of radiation.

1. Introduction. Rockbolt is the most widely used support element in support systems in underground mines and civil tunnels. Rockbolting design is indeed mainly based on experience and it appears that rockbolting design is simply a business of selection of rockbolt types and the determination of bolt length and spacing, but, one essentially ...
